

KEYSTER Brand

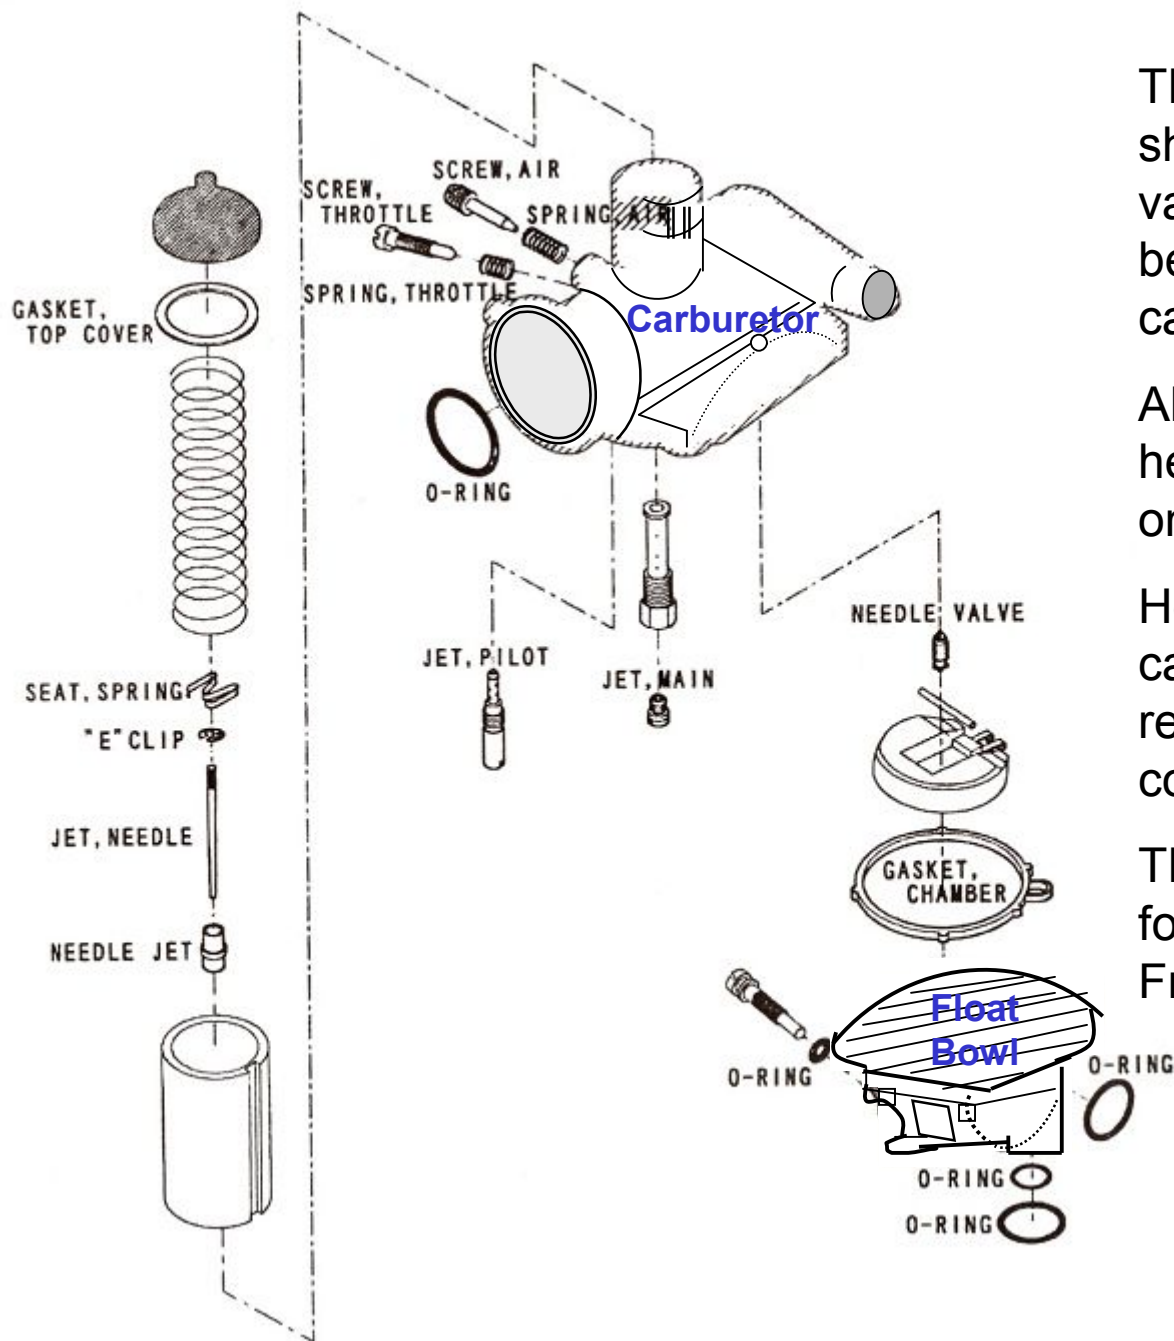

Frontiere Co., Ltd. distributes KEYSTER brand carburetor repair kit.

KEYSTER is a brand of a Japanese precision parts manufacturer with 70 years history.

Its quality is proven by the fact that such parts are being exported to 70 countries in the world.

Not only electronics but such made in Japan precision parts products are appreciated by the world.

Please see the details of KEYSTER carburetor repair kit in the following pages as proposal to you.

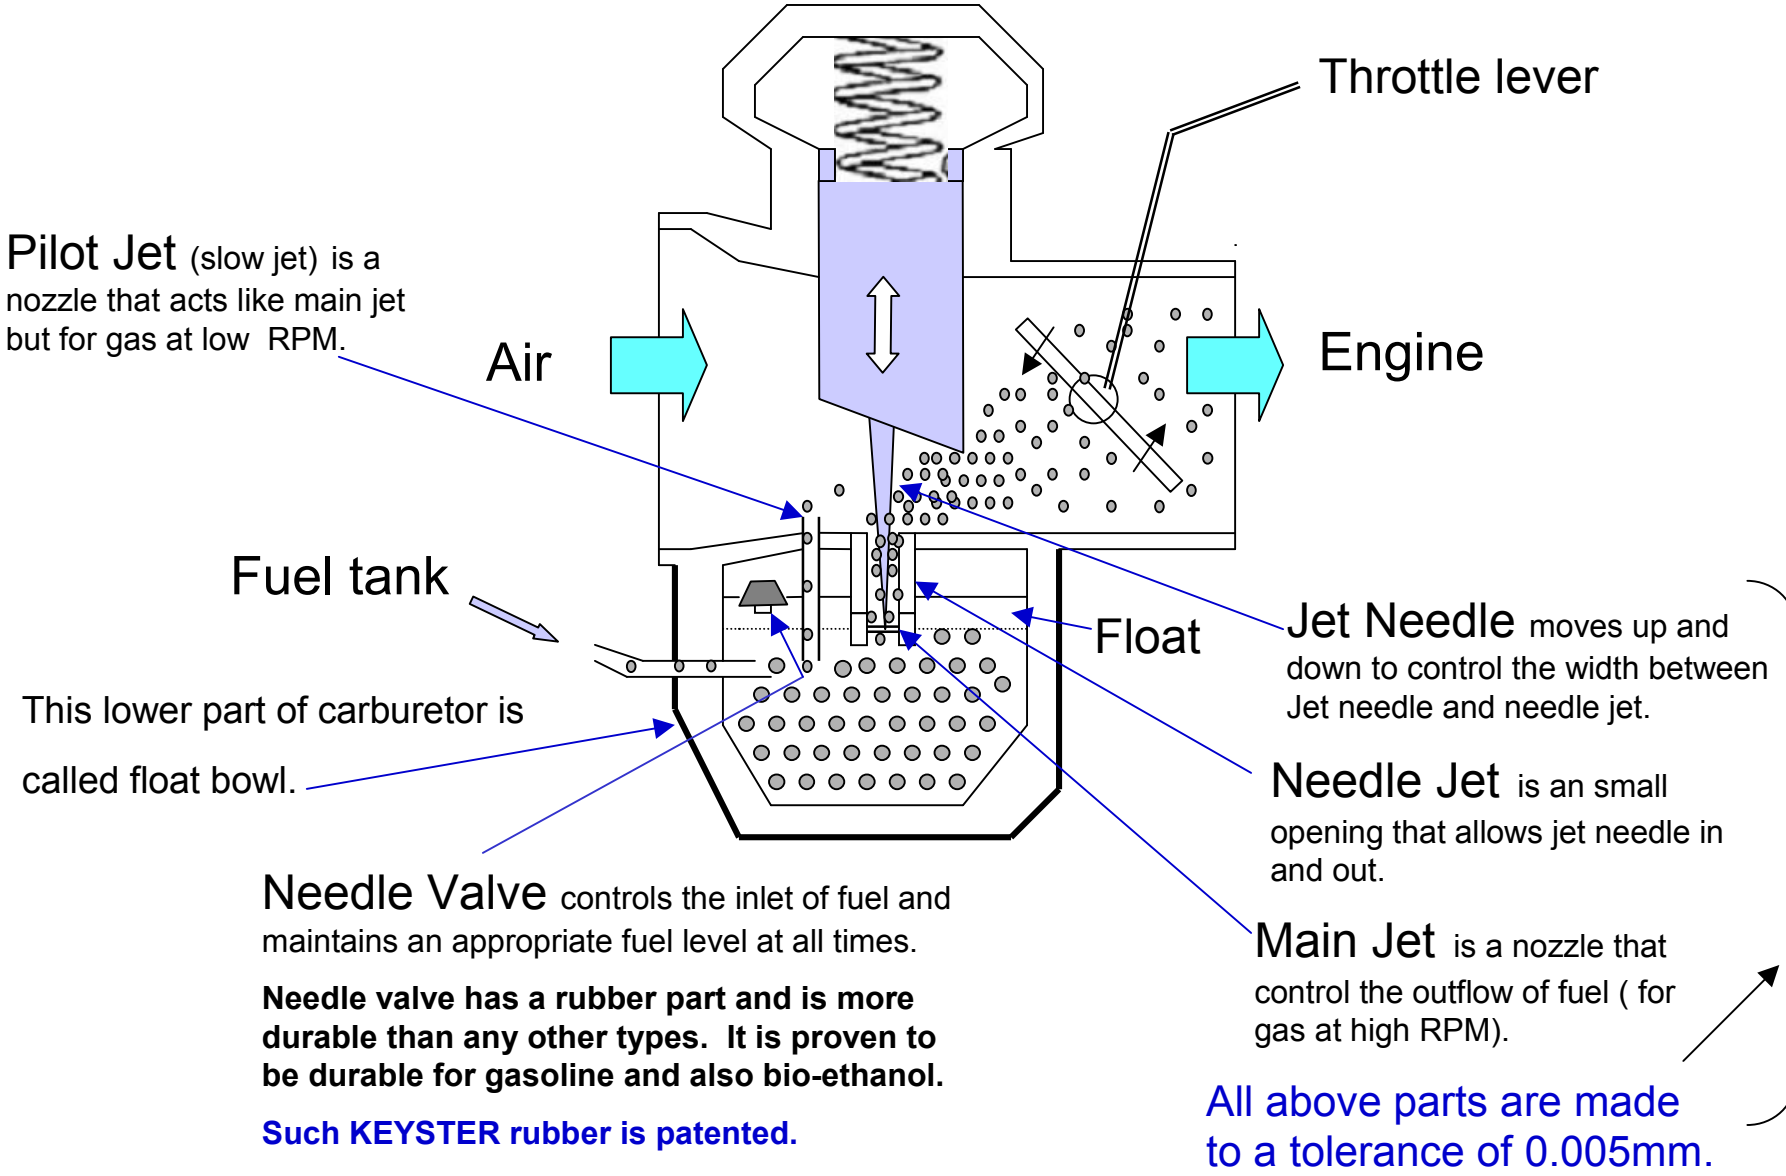

This is the general image (as shape of each carburetor varies) of correspondence between repair parts and carburetor.

Also, the parts set described here may change depending on carburetor model.

However, the sequence of carburetor dismantling and reassembling is mostly common.

The concrete sequence will be followed by distributor, i.e. Frontiere Co., Ltd.

Diagram for how carburetor works

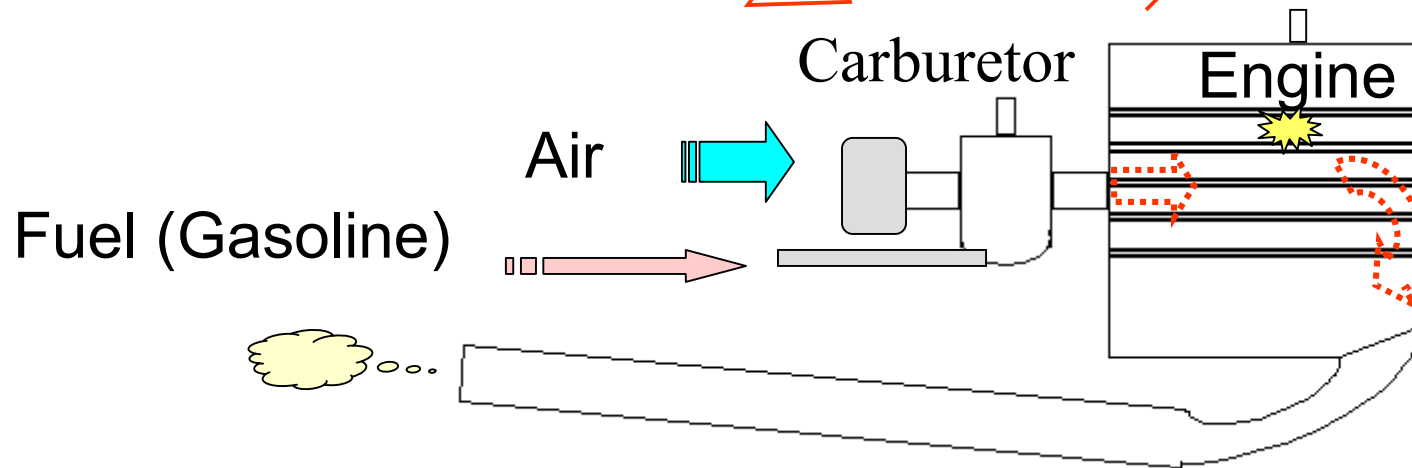

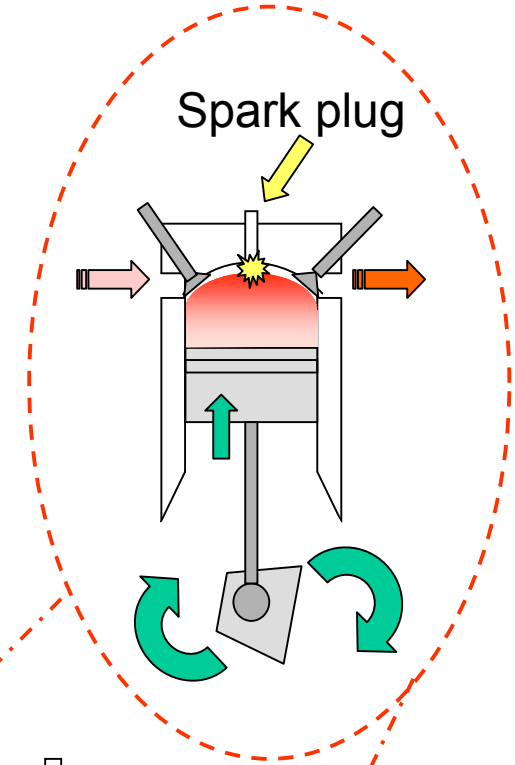

RPM: Revolution per minute

● Fuel (Gasoline)

Carburetor blends air and gasoline and send such mixed gas into internal combustion engine.

Business model as local distributor for motorcycle trouble

High temperature, high humidity and unpaved road in some area, are elements of heavy burden to motorcycle.

Such elements often cause troubles to;

1. Tires and brake system
2. Electric instruments system
3. Engine system

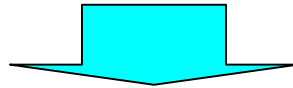

Among 1, 2, and 3, the problem 3 is the most difficult problem for general consumer (motorcycle rider) to solve by themselves and the most costly.

Many of engine system troubles are caused by malfunction of carburetor therefore, being able to deal with carburetor trouble can be business opportunities.

Business model diagram

When engine trouble by malfunctioned carburetor occurs, the solution is offered by (motorcycle) garage.

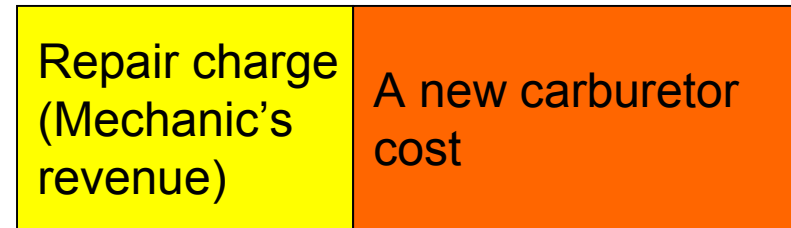

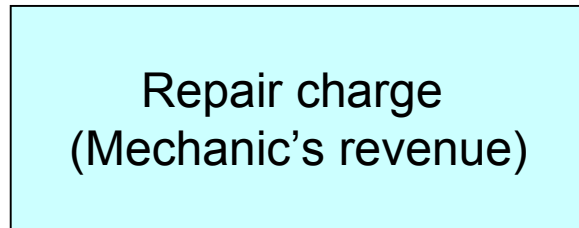

Case 1

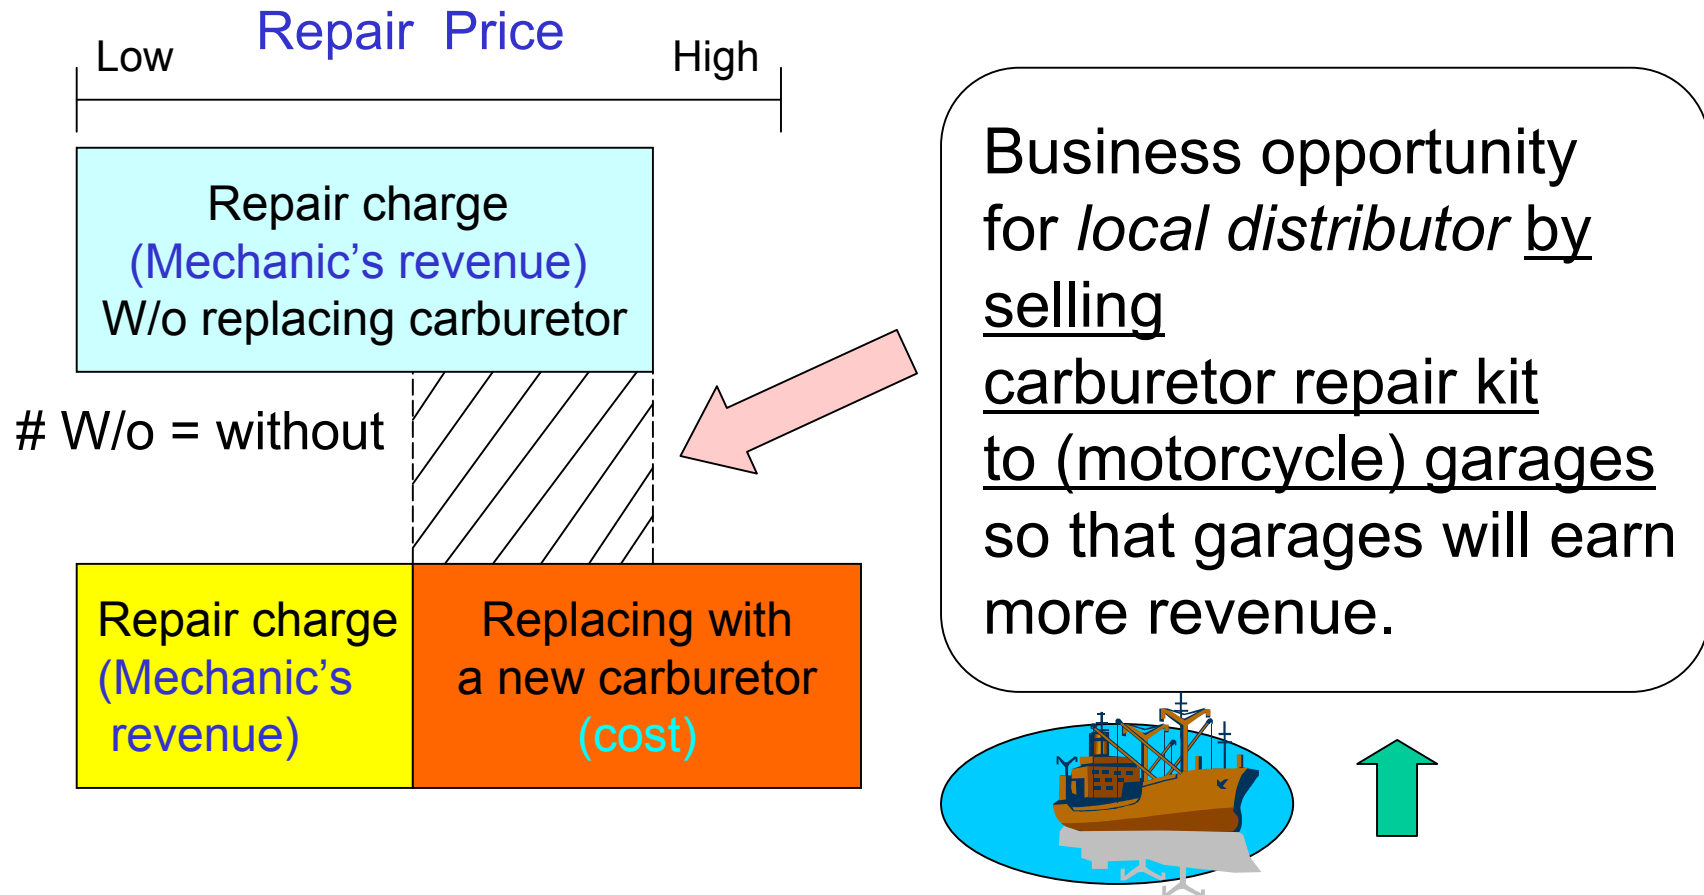

Case 2

Mechanic overhauls and repairs the carburetor

Mechanic replaces carburetor by a new one.
